*Architectural Redirection is the creation of Robert Warren and it can be applied to any other model to demonstrate the universal principles for playing in the zone. Architectural Redirection is a model for transcending ordinary states of thinking and is an ontological model for anyone who is interested in taking their game/life to the next level of performance. Robert Warren considers himself to be a Business/Sports Architect with a unique approach to transcending the artificial boundaries that prevent people from all walks of life to discovering their innate intelligence. He is not a medical, psychiatric, or philosophical expert. His approach to coaching is unique and can immediately impact the performance of players in their first session, provided the client/player takes his own responsibility for applying what is being suggested.*

*Furthermore, Warren's coaching is intended to show others how to find the zone in a step by step process so that previous and accidental trips into the zone are an effortless experience. Warren does not claim to be a medical, psychiatric or otherwise health-related practitioner. He also does not claim to be a philosophical expert, nor does he assert that his coaching is to be a replacement for any medical, psychiatric, or otherwise health-related practitioner's program. It is the engagement of the reader/recipient of the coaching that allows for a powerful result to occur. It is the responsibility of the client to create value from In The Zone Technologies, LLC, and to take appropriate steps and precautions by contacting their regular health specialist, be it mentally or physically based. Any person(s) on psychiatric medications should not participate in In The Zone Technologies, LLC programs and procedures unless specifically approved by their regular doctor, psychiatrist and/or psychologist/therapist. It is the responsibility of the client to disclose any and all medications and procedures they may have on a daily basis for their health so that In The Zone Technologies, LLC can suggest appropriate actions... whether it be to continue with coaching and health products, or to stop, or to involve all doctors related to the client in the intent and purpose and procedures of In The Zone Technologies, LLC.*
